## ABOUT ME

Hello, I am Sérgio Oliveira, a Frontend Developer who discovered in this profession a way to significantly contribute to the enthusiasm for technology that has always been present in my subconscious.

I have always been passionate about games and interacting with technology, and for this reason, I have been studying programming for a little over a year to satisfy my desire to be immersed in the tech world. I have experience in another field, which provided me with valuable skills such as teamwork, effective communication, and problem-solving abilities.

My current goal is to find an opportunity in the job market that allows me to apply what I have learned, learn from experienced professionals, and contribute to the growth of the team. Having completed and published over 10 projects on social media, I am ready to continue fueling my curiosity, learning, and developing projects that make meaningful contributions.
