### ABOUT ME

Hello, my name is Sérgio Oliveira, and I am a frontend developer currently living in Portugal. I love doing different activities throughout the day and feeling like my time was well spent. I am very proactive and enjoy keeping my tasks and studies organized. I moved to Portugal to study programming and found the opportunity to align my motivations and dreams in this field. Over the past year, I have focused on learning JavaScript and gained experience with tools like React, Git, Figma, TypeScript, Node, and Styled-components. To take on more complex projects, I kept improving my knowledge in modern and dynamic frameworks such as NextJS, Tailwind, Vite, Prisma, and more.

I have a strong passion for learning and am very curious, as I believe knowledge is key to overcoming complex situations and solving challenges and problems. I try to be communicative and dedicated, ensuring transparency and keeping up with tasks alongside my team. This helps me build trust and credibility, creating an environment where I can rely on my colleagues and provide support whenever needed.

After completing over 10 projects and making nearly 200 commits, deploying on platforms like Vercel and AWS, I have built a solid foundation to look for a job. I am eager to contribute and learn from experienced professionals, helping the team grow and develop large-scale digital solutions.

### EDUCATION

2023 - 2024

Full Stack Developer

DevCLUB

### LANGUAGES

English

Portuguese

Spanish

### HOBBIES

Listening Music

Travel

Coding

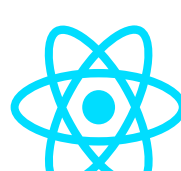

Games

### SKILLS

JavaScript

React

Figma

Tailwind CSS

NEXT JS

Styled-components

Material UI

TypeScript

Git

CSS3

Vite

### MY PROJECTS

#### Tech Solutions Project

[GitHub](#)

I developed a Landing Page for Virtual Headsets using React.js, with styling done through the styled-components library.
