PROFILE

My name is Sérgio Oliveira and, as a FullStack Developer just starting out in my career, I have a genuine passion for creating solutions that make an impact. I recently left the heat of Rio de Janeiro and embarked on a journey across Europe, seeking to learn and grow in the technology field. I am looking for my first opportunity to apply what I have learned and evolve side by side with experienced professionals.

I am driven by curiosity, a desire to learn and a desire to collaborate with teams that share this passion for innovation. If you are looking for a motivated, committed professional who is ready to take on new challenges, I would be happy to talk about how I can contribute to your team. Let's create solutions together and turn ideas into reality!

MY PROJECTS

BurgerShop

Tech Solutions

Burger Shop Project

[GitHub](#)

BurgerShop is a full-stack application that provides a complete online burger shop experience, integrating a robust backend API with a fully responsive frontend interface. This project was developed using modern technologies, focusing on practicality, efficiency, and security, offering a comprehensive end-to-end solution.

LIVE

[burguershop-eight.vercel.app](#)

Tech Solutions Project

[GitHub](#)

I developed a Landing Page for Virtual Headsets using React.js, with styling done through the styled-components library.
