PROFILE

I'm Sérgio Oliveira, and as a FullStack Developer at the beginning of my career, I have a genuine drive to create solutions that generate impact. I recently left the heat of Rio de Janeiro and embarked on a journey through Europe, seeking learning and growth in the technology field. I'm looking for my first opportunity to apply what I've learned and evolve side by side with experienced professionals.

I'm driven by curiosity, the desire to learn, and the desire to collaborate with teams that share this passion for innovation. If you're looking for a motivated, committed professional who's ready to take on new challenges, I'd be happy to talk about how I can contribute your time. Let's create solutions together and turn ideas into reality!

MY PROJECTS

BurgerShop

Tech Solutions

Burger Shop Project

[GitHub](#)

BurgerShop is a full-stack application that provides a complete online burger shop experience, integrating a robust backend API with a fully responsive frontend interface. This project was developed using modern technologies, focusing on practicality, efficiency, and security, offering a comprehensive end-to-end solution.
